STATEMENT / GUIDANCE
FOR FOOD CONTACT MATERIALS / PLASTICS

Recyclability

Our packaging films are made with a combination of polymer materials that cannot be readily separated and are not biodegradable. They are of multilayer structure. Polymer resin identification code **07 O** ("Others") is applicable for multilayer materials.

The polymers we use are of virgin material, so no recycled (post-consumer waste) material has been used to manufacture our products.

The preferred method of disposal is incineration to recover the energy. They should be disposed of in accordance with applicable country regulations and may be dependent on local/national collection systems. Recyclability according to the UK system should be chosen as: Film Plastic "not currently recycled" and the category is Plastic (Other).

I trust that this information is suitable for your needs. If there are any questions, please do not hesitate to contact us again.

Sincerely,

A handwritten signature in blue ink, appearing to read "Mika Kuusela".

Mika Kuusela
Quality Coordinator
